

BHASKAR JHORAR

FULL STACK DEVELOPER

+91 9521318144 | bhaskarjhorar@gmail.com | Sector 70A, Gurugram | taarvik.co.in | github.com/bhaskarjhorar-byte

SUMMARY

Full stack developer with hands-on experience building production web applications end to end — from a live e-commerce platform (Taarvik) to a real-time multiplayer game and an internal HR evaluation system. Comfortable across the stack: React/Next.js on the frontend, Node.js/Express on the backend, and both SQL (PostgreSQL) and NoSQL (MongoDB) databases. Focused on clean architecture, responsive UI, and shipping features that hold up in production.

EXPERIENCE

Full Stack Developer | AttackFence

08/2025 – 12/2025 • Gurgaon

- Designed and built a Self Evaluation Portal enabling employees to complete digital performance evaluations, with role-based dashboards for Admin, HR, and Employee access levels.
- Built end-to-end evaluation workflow covering self-assessment submission, manager feedback, performance ratings, progress tracking, and historical evaluation records.
- Owned both frontend and backend for the portal, gaining full-stack ownership of system architecture and data flow.
- Developed a real-time multiplayer Ludo game using Socket.io for live player interaction, with a responsive game board and gameplay logic optimized across screen sizes.
- Used Express.js to handle server-side routing and manage concurrent multiplayer game sessions.
- Built an internal task management tool (add/edit/delete tasks) with local storage for persistent state across sessions.

PROJECTS

Taarvik — Menswear E-commerce Platform

2025 – Present • taarvik.co.in

- Built and shipped a live, production e-commerce site for menswear essentials — covering product browsing, wishlist, cart, orders, and newsletter subscription.
- Developed the frontend in Next.js and the backend API in Node.js/Express, with PostgreSQL (managed via pgAdmin) as the primary data store.
- Handled both frontend and backend independently, from schema design to deployed UI, for a customer-facing production site.

Ludo Game (Multiplayer)

- Real-time multiplayer game with live player interactions via Socket.io and responsive boards across devices.

To-Do List Application

- Lightweight task manager with add/edit/delete and local-storage persistence.

EDUCATION

Master of Computer Applications | WCTM

08/2023 – 03/2025 • Farukhnagar, Gurgaon

Bachelor of Computer Applications | WCTM

08/2020 – 03/2023 • Farukhnagar, Gurgaon

SKILLS

Frontend: React.js, Next.js, HTML5, CSS3, JavaScript (ES6+)

Backend: Node.js, Express.js, Socket.io, REST APIs

Database: PostgreSQL, pgAdmin, MongoDB

Other: Git, Role-based Access Control, Responsive Design
